1. The following is an examiner's statement of reasons for allowance:

The present invention pertains an apparatus and a method of manufacturing a semiconductor integrated circuit for testing the semiconductor integrated circuit. The prior arts do not teach an ancillary test device comprising a test pattern memory for storing a plurality of test pattern data sets corresponding to a plurality of test items for testing a digital circuit, a test pattern signal generator into which are test written pattern data selected from a plurality of test data sets stored in the test pattern memory, a control section for controlling an operation for the test pattern data selected from among the plurality of test pattern data sets stored in the test pattern memory and an operation for writing the selected test pattern data into the test pattern signal generator and the test device generates a test input pattern signal from the semiconductor integrated circuit under test on the basis of test pattern data written in the pattern signal generator and determines a test output pattern signal output from the semiconductor integrated circuit under test on the basis of the test input pattern signal, thereby testing the digital circuit of the semiconductor integrated circuit under test. Hence, the prior arts of record do not anticipate nor render obvious the claimed inventions. Thus, claims 1-20 are allowable over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
